 European Trademark & Design Attorney
 Dipl.-Ing. (Univ.)
 IP practice since 2008

+49 (0)89 9545-3349-3
 warthmueller@wnw-ip.com

Jürgen is a German and European patent attorney as well as European Trademark and Design Attorney specialized in the fields of patent, utility model and trademark law. He applies his technical expertise from contentious proceedings in a goal-oriented manner when drafting applications for protective rights and representing clients before the offices. In doing so, he strives to combine business and legal aspects in order to efficiently and effectively lead applications to their goal.

VITA

Jürgen studied mechanical engineering at the Technical University of Munich (TUM) with a focus on micro and medical technology and has been working in the field of intellectual property since 2008. He advises medium-sized companies and corporations as well as start-ups and individual inventors.

Prior to founding Wenzel Nemetzade Warthmüller Patentanwälte Part mbB, Jürgen worked for several renowned patent and law firms in Munich, focusing on intellectual property applications and contentious proceedings.

He gained expertise in contentious proceedings by working with Bird & Bird LLP, a law firm specialized in international patent litigation.

Due to the large number of disputes, Jürgen has particular expertise in drafting third-party oppositions and in conducting two-sided proceedings, such as opposition and appeal proceedings before the German Patent and Trademark Office and the European Patent Office. Furthermore, he is well-versed in patent litigation before the civil courts and in nullity proceedings before the German Federal Patent Court.

He applies experience gained in contentious disputes in a target-oriented

manner to his current main area of practice, the drafting of applications as well as representation in examination proceedings before offices. In this regard, he particularly relies on a vast experience gained in cooperation with the law firm Grünecker Patent- und Rechtsanwälte PartG mbB.

In addition, Jürgen drafts license agreements, prepares infringement and validity opinions, evaluates intellectual property rights and enforces them. Finally, he also advises his clients in matters concerning trademark, employee invention and design law.

Jürgen is a member of the German Chamber of Patent Attorneys (PAK), the Institute of Professional Representatives before the European Patent Office (epi) and the International Federation of Intellectual Property Attorneys (FICPI).

TECHNICAL EXPERTISE

In addition to a high level of knowledge in general mechanical engineering, he has extensive knowledge, for example, in the fields of automotive engineering, road safety systems, everyday objects (e.g. cutlery, crockery, face shields, mouth-nose masks, barbecue accessories, lighting systems, vacuum cleaners ...), indoor and outdoor sports equipment, bicycle technology, micro and medical technology, and computer-implemented inventions.

SELECTED MANDATES

- Advising and representing an American technology company in the field of television technology in numerous litigation proceedings.
- Advising and representing an automotive supplier in patent prosecution and litigation.
- Advising German and foreign start-up companies in the field of sports equipment.
- Advising and representing numerous German and Japanese companies in patent application and opposition proceedings before the GPTO and EPO.
